

Kids cops computers program has helped me by letting me explore the Internet because i never had a laptop or computer before so i got to explore the Internet. Its also helping me by whenever i need information on things that i don't know about i can always search it up in google and get the info. What i have accomplished by having a computer is that i have learned allot of things about working a laptop. What i accomplished by having a ebuddy is that whenever i have to tell someone something that's happening inside my life or if something is wrong i can always know that i can tell Leena (my ebuddys name) because i know that she will listen and she will give me advice on what to do,i know that i can tell her anything. Kids cops and computers is a very great program which gives people who haven't ever had a computer to learn how to use one, we also have to send pieces of work(2 assignments a month) which makes us do the work even if we don't want to because if we don't the computer will be taken away. I also think that the program is very kind because the program is giving random students from schools a free computer/laptop for free and all we have to do to keep the laptop/computer is send assignments and not to go on bad sites which are rules that we all can follow because they are easy, which is why kids cops computers is a nice, kind program. The program is also very generous because they have been giving out allot of things that are free too like prizes and gifts when they already gave us this laptop for free. I hope that more kids have the opportunity that me and my school have had because this is a very great opportunity for kids and students out there. 😊
