

How the kids, cops, and computer helps me

The kids, cops and computer program helped me with a computer, because now I can get my school projects done, like the one “Who Said Lyrics Don’t Matter?!”, and it’s been much easier to get my assignments done on time, because when my family only had one computer, my dad was always usually on it doing his work, and when I had to do my assignments, I had to wait a LONG time!! But now, with my own laptop, I’ve accomplished great projects in no time! The program is also helping me with an ebuddy, because now I can write to an online friend, and writing is actually one of my hobbies, I have a diary where I like to put my thoughts down and how my days go and stuff. And with an ebuddy I can share my thoughts with that friend, and also talk about things I have in common, and it builds a great relationship, even if it’s online. Though it’s still not the same as face to face, but what I like is how we have meetings sometimes, and sometimes you can even meet your buddy if you’re lucky. What I like about the kids, cops, and computer program is that it only gives a computer to a person who uses it for a good use, rather than doing something random on the internet or something. This program has given me an opportunity which other people could not get and I’m feeling very lucky and grateful for it. I think it’s great what your program is doing, and I’m very, very happy to be one of the kids to be chosen to receive this wonderful opportunity! Without this program, I’d have to rely on my school computer and my friends to sometimes get my projects and the printing done! And I want to say a real “Thank You” for what your organization has presented to me!!
