

Merry Goes Around? Merry Go Round!

How has the Kids, Cops, and Computers program helped me out? I've been struggling to say that the "Kids, Cops, and Computers Program" is the reason for all my high grades!

Was that good enough?

Honestly, this program truly has helped not just me, but all my friends who are a part of it. Merry Go Round has not only given us a wonderful present but a chance to be successful.

To me, everything was a surprise the day my middle school principal called me and two other friends down.

For many people it may seem as something that's not a big deal, but to a kid like me, it means a lot.

Let's face it; we're a generation that relies on technology. Without technology, we wouldn't be able to complete homework the convenient and professional way.

A lot may think giving away a computer to a kid is useless because all they'll do is surf the internet and not care about their school work. That's not true. Sure we do surf the internet once in a while however there's more to it. We use computers to research. We use our computers to learn to type. We use computers to type homework. We use computers to communicate with friends and family. We use computers to see our class website. We use computers to submit homework to our teachers. We use computers to save homework. We use computers to print our typed work. We use computers to view media. We use computers to explore the world around us.

Of course the list goes on and on and on but I'll just stop there!

All in all, having my very own computer with internet access literally saved me!

Merry Go Round has definitely made a lot of people merry!

Merry Go Round where merry goes around!

Lastly, if it wasn't for my computer, I wouldn't be able to write what you're seeing right now!
