

Kids Cops and Computers

By: Zakia N

4/19/2011

Kid's cops and computers have helped me in many different ways. Kid's cops and computers has helped me with my assignments, tests, etc...how you ask all because of kids cops and computers and obviously the laptop that they kindly provided for me. Whenever I need help I use my laptop such as for projects and also the printer. It's not only me who gets me good marks but its kid's cops and computers they have helped me accomplish this year in many ways I can't say. From c's to a's and b's.but the important thing was that I got to know a very special person. Who is very nice. Who doesn't do the same things as me. I got to know there daily life and that person got to know mine. It's my ebuddy and whenever I need help I ask him if there is advice needed I ask him. He helps me in many ways. I also get know more about police officers to. I always thought they were scary now they seem like some helpers that are there to help me.And you know what now I say I may be one to one day. We have many things in common and many and I mean many things not in common. I get to express my self-knowing that I'm safe. Sometimes kids cops and computers comes to my school to give presentations.to tell you the truth not many people care but me I feel safe knowing I have help around and that I will always. This all happened because of KIDS COPS AND COMPUTERS!!
